Comments (Reference above questions as appropriate.)

I performed a SWPP inspection on SP 10 from Sta:# 12371+00 to Sta:# 12807+43. The only activity or ground disturbance found between these station numbers, was Line Locating/Pot Holing being performed at ROW crossing on Honeysuckle Rd. at Sta:# 12690+43. No more activity in this area at this time.

Note: It is a condition of National Pollutant Discharge Elimination System and Erosion and Sediment permits that a maintenance program be conducted to provide for the operation and maintenance of all BMPs to be inspected on a weekly basis and after each stormwater event. Please list in the space provided comments to note if repairs or replacement are needed or have been made for BMPs as a result of the inspection. Failure to conduct the required inspection may result in permit suspension or the imposition of civil penalties. If supplemental monitoring is required as part of a permit condition this form may be used to meet those monitoring requirements.
