**Subject:** RE: MVP Priority Review for Slip Mitigation Variances ATWS-SM-076\_SM-078 (SHPO FR# 15-67-MULTI-178)

**⚠ CAUTION:** This email originated from an external sender. Verify the source before opening links or attachments. ⚠

Dear Mr. Friedman:

We have reviewed the information that was submitted for the aforementioned project. As required by Section 106 of the National Historic Preservation Act, as amended, and its implementing regulations, 36 CFR 800: "Protection of Historic Properties," we submit our comments.

According to the submitted information, two new workspaces (MVP-ATWS-SM-076 and MVP-ATWS-SM-078) are being proposed to address slips that have occurred along the pipeline corridor in Webster County, WV and to stabilize the hillsides. Workspace MVP-ATWS-SM-076 is located south of Cowger Hill Road and abuts the eastern edge of the pipeline corridor between mileposts MP 82.70 and 82.77. Workspace MVP-ATWS-SM-078 is located south of Elk River Road and abuts the western edge of the pipeline corridor between MPs 86.60 and 86.80. Tree clearing will be necessary in both workspaces. The direct and indirect areas of potential effects (APE) are consistent with those defined for the previously surveyed pipeline corridor.

Archaeological Resources:

Archaeological investigation of the workspaces included visual reconnaissance. Steep terrain and disturbance resulting from the active slip were observed. No archaeological resources were identified. As a result, we concur that no further archaeological investigations are warranted. In our opinion, use of these workspaces will have no effect on archaeological historic properties.

Architectural Resources:

We have reviewed the submitted report and determined no further consultation is necessary regarding the aforementioned project variances. The submitted documentation indicated no aboveground properties are located within the direct APEs, nor will any resources have a view of the proposed work areas. The variances are also located within the previously established visual APE for the overall undertaking. Thus, no further consultation is necessary regarding these project elements; however, we ask that you contact our office if the project should change.

We appreciate the opportunity to be of service. If you have any questions regarding our comments or the Section 106 process, please do not hesitate to contact Mitchell K. Schaefer, Architectural Historian, or me at your earliest convenience.

Sincerely,

**Lora A. Lamarre-DeMott**

**Importance:** High

Good Afternoon Lora and Mitch

Attached is a letter report for two (2) Slip Mitigation Variances.

As per our agreement of 3/13/2019 please respond with your comments via email to the recipients who are copied above.

Please be advised that a hardcopy of this report has been sent to your office.

Thank you

JT
