Comments (Reference above ques	stions as appropriate	.)		
Hiked from the big V on Reese Mounta ROW has been stabilized with erosion	ain down to route 11 du control blanketing and	ring today's SWPPP inspection. The temporary stabilization.	nis entire area is inac	tive and the
Grass is growing on most of the ROW	and perimeter E&S cor	ntrols are holding up well		
Light was falling on and off throughout increased in intensity	the morning and scatte	ered dense fog was present as wel	I. By the afternoon ho	owever, rain
Overall everything appears to be in co	mpliance and no conce	rns were observed during today's i	inspection	
No additional punch list items were ob	served in today's inspe	ction		
·	, ,			

Note: It is a condition of National Pollutant Discharge Elimination System and Erosion and Sediment permits that a maintenance program be conducted to provide for the operation and maintenance of all BMPs to be inspected on a weekly basis and after each stormwater event. Please list in the space provided comments to note if repairs or replacement are needed or have been made for BMPs as a result of the inspection. Failure to conduct the required inspection may result in permit suspension or the imposition of civil penalties. If supplemental monitoring is required as part of a permit condition this form may be used to meet those monitoring requirements.
