¹The Corps tracks preliminary jurisdictional determinations and approved jurisdictional determinations through an internal regulatory management database, called Operation and Maintenance Business Information Link, Regulatory Module (ORM2). This database documents Department of the Army authorizations under CWA section 404 and Rivers and Harbors Act section 10, including permit application processing and jurisdictional determinations. This database does not include aquatic resources that are not associated with a jurisdictional determination or permit request or resource impacts that are not associated with a Corps permit or enforcement action.

²Virginia Department of Transportation data were collected from online databases EVR Plan and Smart Portal Estings in March and April of 2022.

³"N/A" indicate that information was not available.
