Subject: Mountain Valley Pipeline - Request for Meeting

Dear Mr. Fellerhoff:

MVP would like to set up a call with you and others associated with the historic district to discuss the concerns raised in your November 21, 2017 letter regarding the Greater Newport Rural Historic District Treatment Plan, specifically the following:

- Reforestation within the district similar to the restoration and revegetation plan MVP proposes to use along the pipeline through the Jefferson National Forest
- Establishment of a mitigation fund
- Drilling under historic water sources
- Use of thicker pipe that can withstand heavy vehicle traffic

We propose a conference call prior to January 10th to discuss your comments. We will set up a conference call once we hear from you regarding an appropriate time and date. MVP looks forward to discussing further.

Thank you for your attention.
