Subject: MVP FERC Docket NO. CP16-10; DHR File Number 2014-1194

Roger –

Thanks for taking time to discuss your recent letter (dated December 17, 2018) regarding the Bent Mountain, Bent Mountain Apple Orchard, and Coles-Terry Rural Historic Districts Treatment Plan implementation. Just to capture the points we discussed:

- MVP will address your comments on the Bent Mountain Apple Orchard and Coles-Terry NRHP Boundary and Period of Significance documents in the draft NRHP nomination that is scheduled to be submitted to your office on April 1, 2019. In the interim, we will contact you or your staff if we have particular issues we wish to discuss related to the comments.
- For the Bent Mountain Rural Historic District PIF, we plan to follow your suggestion in the letter to address comments on the PIF after the draft nominations for the other districts are complete since that will inform the revisions to the PIF. This will necessitate revising our Management Summary/Work Plan schedule for this project – our schedule had the PIF completed in fall 2018. As a result of this approach, we will now revise the PIF and resubmit it in summer 2019 following receipt of comments on the two nominations.
- MVP received no written comments from other consulting parties on the draft documents. If you receive written comments and provide them to us, we will address them in our upcoming submittals. Please ask commenters to file comments formally on the docket as well.

Please let me know if I didn't correctly capture these points or if you have anything to add from our conversation. Megan and I appreciate your time.

Happy holidays. May you enjoy a happy and healthy upcoming 2019.

Evelyn
