**Subject:** Tribal Monitoring 44RN400 and 44RN401

Holly and Elizabeth –

MVP would like to offer the tribes the opportunity to monitor the archaeological excavations at sites 44RN400 and 44RN401 located in Roanoke County, Virginia. These are two nearby sites where we will be implementing a treatment plan involving excavation of two prehistoric sites. We previously provided you a copy of the treatment plan and Phase I and Phase II reports for these sites. Excavation of these sites will likely occur in mid-March – April roughly.

I don't believe that we've had any correspondence from either the Eastern Band or the Cherokee Nation related specifically to these two sites but we wanted to extend the offer. They are not located on the JNF (although I copied Mike just so he'd know the scoop) so you won't be getting an ARPA permit related to this work. They are located on private land so we will be limiting our excavation to the limits of disturbance for the project.

Please let me know if you'd like to monitor any of our activities at these sites and I'll keep you posted on the details as they evolve.

Best,  
Evelyn
